Review remarks: print to printer fails to print/open the generated report if the destination printer is PDF

TASK-1606-SURE	Received	11 Feb 2022	SOLVED	11 Feb 2022	at 110, 100
	Reported by	BBL			
	Type	IMPROVEMENT			
	Project	SURE			

Create extra SURE-events when a task is transferred

Solution: The following events are now passed to the Event Library when a task, a master task or a group of tasks is transferred

At the beginning of the transfer session:

Call SITE_EVENT with:

```
owner = <empty>
,class = LOGUSER
,prog = "Xfer"
,func = "Transfer"
,environment = <destination-environment>
,task = <empty>
,group = PROBLEM
,user = <user-id>
,text = BEGIN-SESSION
```

At the beginning of a task:

Call SITE_EVENT with:

```
owner = <task-name>
,class = LOGUSER
,prog = "Xfer"
,func = "Transfer"
,environment = <destination-environment>
,task = <task-name>
,group = PROBLEM
,user = <user-id>
,text = BEGIN-TASK
```

For each file or RIS-module (this event existed already and is also logged):

Call SITE_EVENT with:

```
owner = <file or RIS-module>
,class = LOGUSER
,prog = "Transfer"
,func = "Transfer"
,environment = <destination-environment>
,task = <task-name>
,group = FILE-CONTROL or <RIS-module>-CONTROL
,user = <user-id>
,text = <variable text>
```

At the end of a task:

Call SITE_EVENT with:

Task	Status	Date ready	Release
------	--------	------------	---------

```

owner = <task-name>
,class = LOGUSER
,prog = "Xfer"
,func = "Transfer"
,environment = <destination-environment>
,task = <task-name>
,group = PROBLEM
,user = <user-id>
,text = END-TASK <number of files and RIS-modules that were transferred for this task>

```

At the very end of the transfer session:

Call SITE_EVENT with:

```

owner = <empty>
,class = LOGUSER
,prog = "Xfer"
,func = "Transfer"
,environment = <destination-environment>
,task = <empty>
,group = PROBLEM
,user = <user-id>
,text = END-SESSION <total number of files and RIS-modules that were transferred during this session>

```

TASK-1608-SURE	Received Reported by Type Project	15 Feb 2022 BBL IMPROVEMENT SURE	SOLVED	19 Feb 2022	at 110, 100
-----------------------	--	---	--------	-------------	-------------

New print overview with all the files that are reviewed during a specific period

Solution: The name of the new batch function is REVIEWED-OVERVIEW

Small improvements for Logon via Windows Account in the case that the SURE UserId is not the same as the Windows account

Solution:

The following changes are made:

1. It is not allowed to log-on if the Windows account is de-activated
2. If the Windows account is de-activated or deleted, then the links between the Windows account and SURE user-id's are removed.
3. If a SURE user-id is de-activated or deleted, then the links between the SURE user-id and Windows accounts are removed.
4. It is not possible to link a SURE user-id to a de-activated Windows account
